

# BOTTLES

Bottles with plastic closures have become the standard packaging for liquid contents with low viscosity. For the piercing-diameters 32 mm and 42 mm piercings for optimal draining are available. In case of water-based contents, protection against corrosion is provided by varnishing and/or PET-coating on the inside. Plastic closures are also available on demand. We produce sizes from 0,125 l to 1,5 l.

## DELIVERABLE SIZES AND VERSIONS

	Volume in l	Ø in mm	Height in mm	Piercing size in mm	Approval	Quantity per EURO-Pallet
BOTTLES	0,125	56	70	24 / 32 *	UN	7.200
	0,25	56	119	24 / 32 *	UN	4.200
