

KOMPI-CAN

Designed as packaging for water-based varnishing systems and paints, the „Kombidose“ combines the advantages offered by surface-protected tinplate packaging (high degree of leak-tightness and stability) and those offered by plastic packaging (completely resistant to corrosion). The body is made of PP, the ring and the lid are made of tinplate with inside PET-coating. This ensures that the contents only come into contact with plastic surfaces. Compared to a can that is made entirely out of plastic, the combination of a plastic body with a ring and lid made out of tinplate offers the following advantages: Filling and mixing can be done with conventional production systems. Higher stability. Improved leak-tightness. Magnetic properties of the ring and the lid allow normal handling. Antistatic version possible.

DELIVERABLE SIZES AND VERSIONS

	Volume (l)	ø (mm)	Height (mm)	Quantity (per EURO-Pallet)
KOMPI-CAN	0,25	108	45	3.040
	0,5	108	72	1.920
	0,75	99	119	1.485
	1,0	108	132	1.040
	2,5	165	157	408
	3,5	165	192	306

Quantity per EURO-Pallet (1.200 x 800 mm) applies to a pallet-height of approximately 2 m.
